S E R I E S

T H E S U M O F A U D I O I N N O V A T I O N

An entirely new creation sculpted from the experience of the past, designed with a vision of the future, and delivered in an unparalleled form factor of premium elegance. The **Apollo Series** has redefined audio excellence through revolutionary technology coupled with innovative design to create a superior entertainment experience.

The **Apollo Series** combines engineering and design never seen before in the marine industry, forever changing the face of marine entertainment and becoming the standard in which all others will be shaped.

FUSION'S DIGITAL SIGNAL PROCESSING

The power of Fusion **DSP** enables the optimization of **Fusion** speakers in each audio zone on your vessel, providing premium audio delivery to all **Fusion** speakers in any environment.

THE WORLD'S FIRST MARINE WI-FI STEREO

Wi-Fi audio streaming provides high quality audio with a faster data transfer rate in comparison with Bluetooth. **PartyBus** over Wi-Fi allows for **quick and simple** network setup.

FUSION-PARTYBUS™

Engineered for those who value the freedom of musical choice, and freedom to play what they want, where they want, **PartyBus** is Fusion's audio distribution network of the future.

OVER-THE-AIR SOFTWARE UPDATES

Over-the-air software updates are now available from your smartphone or compatible device via the free **Fusion-Link™** app, making the **Apollo Series** intelligently simple and always up to date.

The **Fusion** experience leverages the power of knowledge to ensure premium music delivery with **Digital Signal Processing (DSP)** at every step of the audio chain. From the kick drum to your eardrum, we have made it inherently simple to customize your audio entertainment, ensuring the sound quality is maintained across the audio chain. Apollo's incomparable sound quality has created a new era for marine audio entertainment, and is the point of departure for a new generation of audio system solutions.

Welcome to the new era of audio entertainment crafted and engineered by **Apollo** – The God of Music.

770

SRX 400

MULTI-ZONE TECHNOLOGY

The **Apollo Series** uses Fusion's Multi-Zone technology, providing independent control of up to four audio zones on the vessel. Each zone can be named for easy identification, with independent audio adjustments offering the option to custom tune each zone for your preferred listening experience.

ONE PIECE GLASS TOUCH DISPLAY

The **Apollo RA770** is the future of audio entertainment. Trying to locate the right button is a thing of the past - simply tap the screen to pause and play, or swipe through your playlist to your favorite song.

MORE SOURCE OPTIONS THAN EVER BEFORE

Take advantage of the many source options the **Apollo Series** has to offer, including Bluetooth, UPnP, Optical Audio, Advanced SiriusXM features, DAB+ Ready, AM/FM Radio, AUX and USB.

FUSION-LINK™ CONNECTIVITY

Fusion-Link is the industry standard protocol for on water audio integration and control. **Fusion-Link** enables you to control the entertainment right from partnered marine Multi-Function Displays, compatible devices and Garmin watches.

A TECHNICALLY SUPERIOR LISTENING EXPERIENCE MADE SIMPLE.

DSP SOUND OPTIMIZATION

The power of Fusion's **DSP** enables the optimization of **Fusion** speakers in each audio zone on your vessel, giving you premium audio delivery to all **Fusion** speakers in any environment. Our system approach ensures every step of the audio chain is optimized through calculations by our audio engineers to deliver a technically superior listening experience – without the need for you to have a technical understanding. From the kick drum to your eardrum, **Fusion DSP** reproduces your music the way the musicians intended.

Note: The **Fusion-Link** app is required for setup.

SUPERIOR SOUND QUALITY IN EVERY ENVIRONMENT

Precisely calculated loudness curves optimized for the human ear ensure quality audio delivery of your favorite song **at every volume level**, giving you quality, full range sound whether you have your music turned all the way up reeling in the catch of the day, or you're relaxing quietly in the cabin.

The sophisticated feed-forward limiter anticipates a peak in the audio and adjusts the gain to ensure a distortion-free listening experience. This provides protection from overloading your speakers, giving you the confidence to play what you want, how you want, season after season.

Custom profiles can be **developed for key boat manufacturers** to increase value, save time and give customers the ultimate in customized audio entertainment.

EASY-TO-INSTALL DSP PROFILES RIGHT FROM YOUR SMARTPHONE

Setting up your **DSP** profiles is made simple with the free **Fusion-Link** app. With just a few clicks, you can set up the preconfigured **DSP** profile once and get back to enjoying what you love on the water, while listening to high quality audio customized for your ears and the environment.

Download the free **Fusion-Link** remote control app for Bluetooth and Wi-Fi from the Apple® App Store or Google Play™ and enjoy the freedom of wireless control from your compatible device.

F R E E D O M O F M U S I C A L C H O I C E

PARTY MODE

One Bluetooth source playing audio perfectly synced across three PartyBus enabled stereos in Party Mode.

PERSONAL MODE

One Bluetooth source playing independently in the Cabin without disrupting Party Mode in the Salon or Flybridge, while another Bluetooth source continues to play audio perfectly synced across the Flybridge and Salon in Party Mode.

PartyBus is Fusion's audio distribution network of the future. Engineered for those who value freedom of musical choice, freedom to play what they want, where they want, it gives freedom to command the party across the whole boat or quietly relax in the cabin, regardless of others preferences.

The power of **PartyBus** kicks in when you add more **PartyBus** enabled stereos to your entertainment system. Each additional **PartyBus** enabled stereo gives you the option to join Party Mode and play the same perfectly synced audio source through the entire vessel. Opt into Personal Mode and listen to available audio sources from your stereo in the area of your choice without disrupting Party Mode in the other areas of the vessel.

PARTYBUS GIVES THE FREEDOM OF MUSICAL CHOICE ACROSS THE ENTIRE VESSEL

THE FIRST WIRELESS MARINE ENTERTAINMENT NETWORK

You can even go wireless: the **Apollo RA770** and the **SRX400** are designed with Wi-Fi on board so you can **wirelessly connect multiple Apollo stereos** without running any cables, which reduces installation time, cost and complexity.

INSPIRED BY APOLLO, THE GOD OF MUSIC

Building on Fusion's industry recognized **True-Marine** design philosophy, the new **Apollo Series** led by the **Apollo RA770** takes marine audio entertainment to the next level. Creative design and technological brilliance has created the world's first purpose-built marine entertainment system with a **one piece glass touchscreen display**, built in **Wi-Fi streaming** and **Fusion DSP Technology**. The **Apollo Series** will forever change the face of marine entertainment and become the standard in which all others will be shaped.

Regal 42 Fly

- The **Apollo RA770** harnesses the power of **Fusion DSP**, enabling the optimization of **Fusion** speakers in each audio zone on your vessel, giving you premium audio delivery to all **Fusion** speakers in any environment. From the kick drum to your eardrum **Fusion DSP** reproduces your music the way the musicians intended.
- Being the world's first marine Wi-Fi stereo, you can finally stream music from your device via UPnP, providing higher quality audio streaming. The **Apollo RA770** and the **SRX400** are designed with Wi-Fi on board so you can wirelessly connect multiple **Apollo** stereos without running any cables, reducing installation time, cost and complexity.
- The power of **PartyBus** enables other **PartyBus** products on the network to connect to the **Apollo RA770** in **Party Mode** and play the same perfectly synced audio source through the entire vessel. Opt into **Personal Mode** on any **PartyBus** enabled product and listen to available audio sources from your stereo in the area of your choice without disrupting **Party Mode** in the other areas of the vessel.

KEY FEATURES

The **Apollo RA770** surpasses previous standards set in audio entertainment, creating a new, world-class audio entertainment experience featuring:

Custom audio profiles for each zone in your vessel delivers higher quality audio

Fusion-PartyBus is the new way to enjoy music on your boat

Over-the-air software updates from your compatible device via the free **Fusion-Link** app

Wi-Fi audio streaming via **PartyBus** and UPnP

4.3" touchscreen with play, pause and skip functions using touch display commands

Independent audio and volume control is available in 4 separate audio zones

Control your tunes from a compatible Multi-Function Display, compatible device or Garmin watch

IPx7 Ingress Protection rating

Class-D amplifier design for higher efficiency and output

280 W peak power output

2 Ohm stereo stable for wiring up to 2 pairs of speakers per channel

APOLLO SRX400

MS-SRX400

THE APOLLO SRX400 IS A PERFECT COMBINATION OF INTELLIGENT DESIGN & SUPERIOR SOUND

BLUETOOTH AM RADIO FM RADIO UPnP

QUALITY AUDIO IN A COMPACT ZONE STEREO

The **Apollo SRX400** combines the latest design, engineering and powerful feature set of the **Apollo Series** in a compact, versatile form factor. With the ability to connect to **PartyBus**, Fusion's audio distribution network, built in **Wi-Fi streaming** and **Fusion DSP Technology**, the **Apollo SRX400** is the perfect combination of intelligent design and superior sound.

Sea Ray SDX 290 OB

Sea Ray SDX 270 OB

- With an easy, one piece installation and a premium finish, the **Apollo SRX400** can be used as a 2 Ohm stereo stable zone stereo to extend your audio entertainment with up to 2 pairs of speakers per channel.
- The **Apollo SRX400** harnesses the power of **DSP**, enabling the optimization of **Fusion** speakers in each audio zone on your vessel, giving you premium audio delivery to all **Fusion** speakers in any environment. From the kick drum to your eardrum **Fusion DSP** reproduces your music the way the musicians intended.
- The **Apollo SRX400** and **RA770** are designed with Wi-Fi on board so you can wirelessly connect multiple Apollo stereos without running any cables, reducing installation time, cost and complexity. Alternatively if required, you can connect via a standard Ethernet cable.
- Install the **Apollo SRX400** into independent audio areas on board and harness the power of **PartyBus**. Connect to the **Apollo RA770** in **Party Mode** and play the same perfectly synced audio source through the entire vessel. Opt into **Personal Mode** on the **Apollo SRX400** and listen to available audio sources in the area of your choice without disrupting **Party Mode**.

KEY FEATURES

The **Apollo SRX400**, with its innovative technology and design, offers a new world-class audio entertainment experience, featuring:

Custom audio profiles for each zone in your vessel delivers higher quality audio

Fusion-PartyBus is the new way to enjoy music on your boat

Over-the-air software updates from your compatible device via the free **Fusion-Link** app

Wi-Fi audio streaming via **PartyBus** and UPnP

2.7" color display

Control your tunes from a compatible Multi-Function Display or compatible device

IPx7 Ingress Protection rating

Class-D amplifier design for higher efficiency and output

140 W peak power output

2 Ohm stereo stable for wiring up to 2 pairs of speakers per channel

FUSION LINK

F U S I O N - L I N K W I R E L E S S R E M O T E A P P

ENTERTAINMENT CONTROL IN THE PALM OF YOUR HAND

Fusion-Link™ is the most widely adopted protocol for on-water audio integration, trusted by the industry's most prestigious boat builders and supported by the world's leading marine electronics manufacturers. Whether you're on the move or at the helm, **quick and easy access to the onboard entertainment** is only an 'app' away...

- Volume control
- Play / pause / skip
- Source selection
- Zone naming
- Software updates direct from your smartphone
- Quick access to product support and resources
- DSP profile settings
- Zone EQ settings

THE MARINE ENTERTAINMENT STANDARD

Fusion-Link is the industry standard protocol for on-water audio integration and control. It enables partnered marine Multi-Function Displays, compatible devices and Garmin watches to control the entertainment right from your fingertips.

SPECIFICATIONS

MS-RA770

Display	Display Size	4.3"
	Capacitive Touch Panel (with swipe control)	Yes
	LCD Color Display	Yes
	Operating System	FUSION
General	Sources	AM / FM / Bluetooth / Wi-Fi audio streaming / PartyBus / digital optical input / USB audio / AUX x 2 / UPnP / MTP / SiriusXM-Ready (for USA only. Requires optional SiriusXM connect vehicle tuner) / DAB+ (available in Europe and Australia only. Does not support traffic and weather)
	Digital Signal Processing (DSP)	Yes
	Speaker Presets (easy to tune)	Yes
	Fusion-Link Control (Wireless)	Yes
	PartyBus Technology	Yes (receive and broadcast - wired or wirelessly)
	Bluetooth Wireless Technology	Bluetooth audio streaming, music control (via devices compatible with A2DP/AVRCP 1.3 Bluetooth protocols)
	SiriusXM-Ready™	Yes
	Wi-Fi	Yes
	ANT	Yes
	NMEA 2000 (Control via MFD - Fusion-Link)	Yes
	Works With NRX Remotes	Yes
	Digital Optical Input (SPDIF)	Yes
	Fits DIN Cut-Out	Yes
	Water Resistance (IPX Rating)	IPx7 from the front panel when installed correctly
	Internal Amplifier	Class-D
	Peak Power	280 W max
	Languages	Multi-Language User Interface
Connections	Auxiliary Inputs	2 x RCA Inputs (AUX1, AUX2)
	SPDIF Optical Audio-in	One (1) SPDIF port - Supports TV audio output
	Ethernet	One (1) Ethernet port
	USB 2.0 port	One (1) USB 2.0 port (for phone charging / media playback)
	SiriusXM	One (1) SiriusXM port (Requires optional SiriusXM connect vehicle tuner. Does not support traffic and weather)
	AM / FM	One (1) Motorola antenna connector port
	Speaker	4 x speaker (2 zone amplified)
	RCA Pre-Out (Left, Right and Subwoofer)	4 zones
	Operating Voltage	+10.8V - 16V DC
	DAB+ Ready	Fusion DAB+ module is required (sold separately). Only available where DAB or DAB+ broadcast is supported
	Line Out	4 (1 x L + R per zone. Requires external amplification)
	Subwoofer Out	4 (1 per zone. Requires external amplification)
	Updates	Software Updates

MS-SRX400

Display	Display Size	2.7"
	Color Display	Yes
	Operating System	FUSION
General	Sources	AM / FM / Bluetooth / Wi-Fi audio streaming / UPnP
	Digital Signal Processor (DSP)	Yes
	Speaker Presets (Easy to Tune)	Yes
	Fusion-Link Control (Wireless)	Yes
	PartyBus Technology	Yes (control media playback from Apollo RA770 when connected via Ethernet or Wi-Fi)
	Bluetooth Wireless Technology	Bluetooth audio streaming, music control (via devices compatible with A2DP/AVRCP 1.3 Bluetooth protocol)
	Wi-Fi	Yes
	Water Resistance (IPX Rating)	IPx7 (front panel)
	Amplifier	Class-D
	Peak Power	140 W max
Languages	Multi-Language User Interface	English, French, German, Spanish, Dutch, Italian
Connections	Ethernet	One (1) Ethernet port
	AM / FM	One (1) Motorola antenna connector port
	RCA Pre-Out (Left, Right and Subwoofer)	Single zone
	Operating Voltage	+10.8V - 16V dc
	Line Out	1 (1 x L + R requires external amplification)
	Subwoofer Out	1 x mono output (requires external amplification)
Updates	Software Updates	Over-the-air updates via the Fusion-Link app
