

EcoFlow Power Kits

EcoFlow Power Hub

The Power Hub is the heart of Power Kits. It combines 1X Inverter/Charger, 3X MPPT/Battery Charger, and 1X DC-DC Converter in one integrated unit, saves valuable space in your boat, and makes power connection simple as never before.

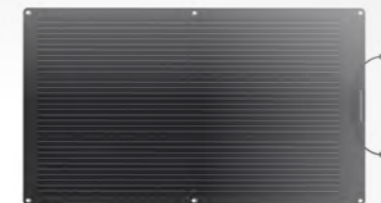

EcoFlow 2kWh/5kWh LFP Batteries

Power Kits use EcoFlow's new LFP batteries. Choose 2kWh or 5kWh options to match your consumption needs. They're stackable with a built-in BMS and auto-heating for cold environments too. Save space, stay safe.

EcoFlow AC/DC Smart Distribution Panel

Link your appliances with the Smart Distribution Panel's 6 AC positions and 12 DC positions. Get control of up to 6 DC positions with the EcoFlow App to monitor, control, and view your energy usage from afar.

EcoFlow Solar Panels

Charge your batteries with EcoFlow's line of solar panels, supporting up to 4800W of solar input, you can pick and choose the amount of solar you need to charge anywhere.

EcoFlow Power Kit Console/EcoFlow App

Control, monitor, and view your power consumption using the Monitor or from the comfort of your phone with the EcoFlow App.
