VMH 35 BENEFITS

The VMH 35 is the perfect standalone instrument for outboard engines.

Designed with stylish mineral glass front lens framed by a brushed stainless-steel bezel, it can display a wealth of critical boat system data in a compact package that's perfect for dashboards, consoles and bulkheads on smaller vessels with limited space.

The VMH 35 has an embedded NMEA 2000 gateway that distributes sensor data inputs such as fuel, trim, and tachometer to other devices like chart plotters, saving the need for an additional external converter.

An integrated GNSS receiver integrates speed, compass, and position into the engine data information, while the dedicated Veratron IBS (Intelligent Battery Sensor) input can provide critical 12V battery monitoring capabilities.
