

**SCANSTRUT**

**ROKK™**

**WIRELESS.**

Edge.

**NEW  
FOR 2019**

Introducing Scanstrut ROKK Wireless - Edge: the latest addition to the world's first outdoor-ready, waterproof wireless charging phone mount range.

Edge securely holds and wirelessly charges your phone even in the toughest outdoor conditions. Now you can keep your phone in sight, fully charged and ready to go...

Right up to the Edge: with the smallest footprint, Edge now means you have even more choice of how and where you install your phone mount and charger combo. Crowded consoles, side-mounting, flat and vertical surfaces are all suitable.

Put your phone on its Edge: Rotate your phone from portrait to landscape to view your favourite navigation app or simply fine tune the position for the optimum viewing angle.

12/24V and IPX6 waterproof, ROKK Wireless – Edge is perfect for boat consoles tight on space or any vehicle working outside in the elements, with simple one-handed operation you can easily dock and instantly start charging your phone. No cable required.

The self-aligning, high-grip jaws accommodate all wireless charging phones and securely hold your device in the optimum charging position every time. Couple this with the innovative adjustable body of Edge and you'll have your phone fully charged, right where you need it.

Install Edge on any surface: a secure 3-point fixing system and a footprint of just 50mm (1.96") diameter maximize your choice of location and a watertight cable pass-through completes the install.

Featuring Qi-certified wireless technology and a "Smart" LED that indicates when your phone is charging. Throw in foreign object detection and thermal cut-off and you're guaranteed safe, reliable charging in all environments. Charging is also possible through non-metallic, waterproof cases.
